Part No. 910-12

Leather Clothing

Made from No. 1 side split cowhide to add strength and heat resistance. Full sized for the utmost comfort. All seams are sewn with Kevlar® thread for longer garment life.

- Available in golden willow (yellow) or buck tan (brown)
- Soft roll collar - for added neck comfort
- Non-reflective snap buttons
- Inside chest pocket and no bind arm pit
- Adjustable wrist snaps
- Kevlar® thread
- Full cut
- Larger sizes available upon request

Glossary

Chrome Tanned- Refers to leather which has been preserved using chromium salts. This tanning produces a soft, heat resistant leather.

Oak Tanned- A type of dry vegetable tanning that is non heat resistant. This tanning process gives a very dense leather.

Side Split- The portion of the hide that covers the rib area of the animal. Stronger and more uniform than shoulder leather with fewer imperfections such as scars and weak fibers.

Shoulder Split- The portion of the hide from the neck and shoulder of the animal. Fibers tend to be weaker than side split.

Grain Leather- Top portion of the hide; smooth, soft and flexible. Used primarily when dexterity is required.

Leather Terminology

Cape Skin- A soft pliable leather which affords the wearer greater dexterity in TIG gloves.

Deer Skin- Soft pliable leather even when exposed to high heat: Used primarily for TIG gloves.

Pigskin- A very abrasive leather that remains soft when exposed to water.

Welting- A 1/4" reinforcing strip of leather sewn between seams to strengthen construction, hide threads and minimize burnout.

Kevlar®- A synthetic fiber developed by Dupont™ Kevlar® will withstand 600°F. It is used as a thread in place of cotton for sewing welding gloves or as a woven material to replace asbestos in gloves or clothing.

Leather Clothing

Cowhide Comfort® Clothing

Offers maximum protection under the most rugged conditions. The Comfort® line of welding clothing is made with high quality leather to ensure maximum protection and comfort. Unlike high temperature synthetic fabrics, cowhide leather is strong, yet flexible and resists cuts, sparks and slag at an economical price.

Jackets

30" Leather Welders Jacket

- Non-reflective, reinforced snap buttons
- Adjustable stand-up, soft rolled collar for added comfort
- Scribe pockets on both sleeves

Flame Resistant Clothing

Comfort® Flame Resistant (FR) clothing is made from 9 oz., 100% visual green cotton. It is cooler, lighter and less expensive than leather. FR Clothing is excellent for warm weather or indoor use where there is light exposure to sparks and spatter. This fabric will maintain its flame resistance through many launderings. Larger sizes available upon request.

2-Ply Laminated PVC Rain Suit (25 mm)

- 3 piece suit: jacket, pant, hood
- Sold as a complete suit only S-XXXL
- Medium weight suit that wears like a heavier suit.
- Material is very flexible and comfortable with less snag and wear resistance.
- Jacket has detachable hood, raglan shoulders, mesh cape back, and air vents under arms, storm fly front, with non-conductive snap at ankles and wrists.

Part No.	Description
3400-S-XXXL	Rain suit 25 mm 3pc

Lightweight 12 mm PVC Apparel

- Lightweight two piece rain suit with handy tote pouch.
- Jacket has attached hood, storm fly front and take up snaps at wrists.
- Pants have elastic waist and snaps at the ankles.

Part No.	Description
3300-S-XXL	Rain suit 12 mm

PVC/Polyester (35 mm)

- Medium weight, PVC coated on a polyester broad loom fabric.
- PVC/polyester material offers good resistance against abrasions, tears and snags, as well as oils, acids and a wide variety of industrial compounds.
- The premium quality PVC used allows suits to stay flexible at cold temperatures.

Part No. 3100
Part No. 3910

Part No.	Description
3100-S-XXXL	Rain jacket 35 mm w/ detachable hood
3200	Universal hood w/ drawstring
3500-S-XXXL	Rain coat 35 mm 49" w/ detachable hood
3910-S-XXXL	Rain pants w/ bib & snap fly

Double Coated PVC/Nylon

- This flame resistant suit is made with a nylon scrim material of 210 denier, laminated both sides with PVC.
- Rip-Stop construction allows for light weight comfort while being highly resistant to snags and tears.
- Material remains flexible in cold weather, yet is light weight and comfortable for warmer temperatures. Resistant to most oils, acids, and chemicals.

Part No. 3102
Part No. 3912

Part No.	Description
3102-S-XXXL	Rain jacket w/detachable hood

ANSI/ISEA 107 Scenarios

OCCULUX®

A: Class 1 / 2

Typical

Under certain conditions

- Permits full and undivided attention to approaching traffic.
- Provides ample separation of the pedestrian worker from conflicting vehicle traffic.
- Permits optimum conspicuity in backgrounds that are not complex; and where vehicle and moving equipment speeds do not exceed 25 mph.

B: Class 2 / 1 or 3

Typical

or

Under certain conditions

- For greater visibility during inclement weather conditions.
- Permits optimum conspicuity in backgrounds that are not complex.
- For use when performing tasks which divert attention from approaching vehicle traffic.
- For conditions where vehicle or moving equipment speeds exceed 25 mph or where work activities take place in closer proximity to vehicle traffic.

C: Class 2 or 3

or

Typical under certain conditions

- For significant exposure to higher vehicle speeds and/or reduced sight-distances.
- Provides added precaution under high task loads where there are many distractions.
- For conditions where the wearer must be conspicuous through the full range of body motions at a minimum of 390m (1280 feet), and must be identified as a person.

Class 1

- The upper two thirds is made of traditional mesh poly-net fabric.
- The lower third is solid ANSI 107 Class 1.
- Reflective striping is compliant with Class 2 configuration.

Part No.	Color	Size
